

Discover the DITEQ Difference!

Pro TEQ-Burnisher

The DITEQ Pro Series TEQ Burnisher is a 27" high powered / High Speed Burnisher designed specifically for the concrete polishing and maintenance market. Powered by a engine much larger than the industry average with a full 22HP Robin (compared to the 17HP wax and floor polish machines). The engine is maintenance friendly, fully certified and EPA compliant and includes a multitude of safety features. The runtime is 4 to 6 hours per LPG cylinder.

A state of the art in burnisher technology including an adjustable head weight setting to adjust the aggressiveness and production rate, power grip floating pad driver with a better bite on maintenance and diamond pads for increase demands of polishing concrete, ergonomically friendly operator handle and controls, a wet kit with integral water tank with easy fill access, center feed water delivery system through the pad driver to minimize the water and slurry using centripetal forces to carry a minimal amount of water dispersing across the complete diamond pad face (less slurry = less mess to cleanup), and the water release system is controlled by the operator with lever switches so the water can be added at the optimal time and amount at full operating speeds.

The DITEQ Pro Series burnisher was designed and fabricated in America using a reinforced steel welded frame to withstand the demands from the American Contractors needing quality equipment to do the job right the first time. A machine they can count on job after job.

The high power, high rotary speeds and high head weight on this machine are ideal for quickly and efficiently generating the higher temperatures needed on many of the guard type products currently and soon to be released for the concrete polishing market. The wet kit is ideal for the wet polishing steps for the final steps in fully polished slab process. This ergonomically friendly machine can be a very quick tool for removing microscratches in guard type coatings and polished floors to restore the full luster and gloss of a newly polished floor.

The propane system includes state of the art in safety features including a catalytic muffler, emission sensing and shutdown system, tachometer, hour meter and maintenance alert, safety fill LPG cylinder with the latest in ODP technology.

The DITEQ Pro Series burnisher carries a full two year manufacturer's warranty.

Power grip floating pad driver with a better bite on maintenance and diamond pads for increase demands of polishing concrete

Specifications	TEQ-Burnisher
Production	33,000 sq ft per hr
Engine	Robin 22 hp
Engine Speed	3,450 rpm
Drum Speed	800-1000 rpm
Polishing Diameter	27 inches
Box Dimensions	L52"xW37.5"xH46"
Shipping Weight	350 lb.
Part No.	G00044

Burnisher Pads Grit	VLM Part No.	M Series Part No.	R Series Part No.
200	161497	161291	
400	161498	161283	161299
800	161499	161259	161307
1500/1800	161500	161267	161315
3000	161501	161275	161323
6000/8000	161502		161331
11000	161503		

Floor Maintenance Pads		
Dimensions	Black Stripper	White Polish
27" x 1" Round	A70017	A70018
